Hosts

Click 'Home' to return to this page, or 'Logout' to log out

In the Websites view, click 'Add Website' to add a new website, or click on an existing website to view its information.

In the New Website form, fill out the information and click 'Add Website' to create a new website. You can also select a domain name registrar and a host with the drop-down menus.

When viewing an existing website, click 'Edit Website' to edit, or 'Delete Website' to delete. Click on a registrar or host to view its information.

Notes: 

This is a note

The Hosts and Registrars views are mostly the same. When you add a host or registrar, it will become available to add to websites.

Host Man

Hosts R Us

If you edit a host or registrar, the changes will be reflected under each website it is associated with. This makes it easy to manage multiple websites that share the same host or domain name registrar, since you are only required to update the information in one place.
